PROFESSIONAL SUMMARY

Full-Stack Developer passionate about building secure, scalable, and well-structured web applications across the entire development lifecycle from designing intuitive user interfaces to building reliable backend systems, managing databases, and deploying to the cloud. Experienced in leading development teams and delivering projects on time. Proficient in PHP Laravel, RESTful APIs, the TALL stack, React, Next.js, and AWS. Committed to writing clean, maintainable code that solves real-world problems.

EXPERIENCE

Junior Programmer • [Bicol University – ICT Office](#)

Legazpi City, Albay | October 2025 – June 2026

- Built the backend of the Bicol University Center of Excellence System using PHP Laravel and MySQL, including database schema design and RESTful API development.
- Developed the backend of the Bicol University Merit System Promotion using the TALL stack (Tailwind, Alpine.js, Laravel, Livewire) and integrated MinIO S3 for scalable and secure document storage.
- Created the Property Management Module for the Bicol University Property Management and Monitoring System using Filament with Custom Pages.
- Led a team of developers in building and maintaining multiple internal university systems — assigned tasks, reviewed code, and ensured on-time delivery.

Backend Developer • [Bicol University – University Student Council Website](#)

Legazpi City, Albay | August 2024 – June 2026

- Designed and built the complete backend system using PHP Laravel and MySQL, including database schema, migrations, and server-side logic.
- Improved transparency and accessibility of student council information for the broader university community.

Backend Developer (Internship) • [StraStan Solutions Corp.](#)

Bicol University College of Science, Legazpi City, Albay (Remote) | February 2025 – May 2025

- Deployed and maintained a CMS on AWS, integrating DynamoDB for dynamic content management and high-performance scalability.
- Designed and implemented RESTful APIs to facilitate seamless frontend-backend communication, ensuring data consistency and reliability.
- Collaborated with UX/UI teams to integrate APIs into customer-facing features while leveraging AWS services for security and uptime optimization.

PROJECTS

Bicol University Merit System Promotion | [Backend Developer](#) 2026

- Built backend using the TALL stack (Tailwind, Alpine.js, Laravel, Livewire) and MySQL; designed database schemas for efficient data management.
- Implemented authentication and access control restricted to verified Bicol University email accounts.
- Integrated MinIO S3 for scalable and secure file storage, managing document uploads and retrieval.

Bicol University Property Management and Monitoring System | [Full-Stack Developer](#) 2026

- Built the Property Management Module using Filament with Custom Pages for an intuitive administrative interface.

Solutions Chapter Content Management | [Full-Stack Developer](#) 2025

- Built the complete backend including CRUD operations for content management and user authentication using AWS Cognito.
- Used DynamoDB as the primary database for scalable and flexible data storage and retrieval.
- Implemented serverless architecture with AWS Lambda for all backend functions, ensuring efficient and cost-effective execution.

Bicol University Center of Excellence System | [Backend Developer](#) 2025

- Built the backend using PHP Laravel and MySQL; designed database schemas to support efficient data storage and retrieval.
- Restricted system access to verified BU email accounts via custom authentication and access control.
- Developed RESTful APIs for smooth frontend-backend communication.

AgTech Web App | [Full-Stack Developer](#) 2024-2025

- Developed front-end for user interaction and product browsing; built backend to handle accounts, product listings, and council data.
- Designed and managed the database for livestock, users, and transactions; created and connected APIs for smooth data flow.
- Deployed and maintained the platform on cloud infrastructure, ensuring security and stable performance.

Employee Attendance Management System | [Full-Stack Developer](#) 2024

- Built a full-stack attendance tracking system including a front-end dashboard, backend logic for recording time in/out and computing work hours, and a database for employee profiles and records.
- Developed APIs for attendance data retrieval and reporting; implemented user authentication and role-based access control.

Unboxed E-Commerce Platform | [Full-Stack Developer](#) 2024

- Built a personal e-commerce site with backend capabilities including order processing, product catalog management, and version control via GitHub.

TECHNICAL SKILLS

Backend

- PHP Laravel
- Laravel Livewire
- RESTful APIs
- Filament

Cloud & DevOps

- AWS Services
- Git & GitHub
- Server Deployment

Frontend

- React.js
- Next.js
- Vue.js
- Tailwind CSS
- Alpine.js
- HTML5 & CSS3

Tools & Methods

- API Integration
- Technical Support
- Debugging
- AI-Assisted Dev

Database & Storage

- MySQL
- DynamoDB
- MinIO S3

EDUCATION

Bachelor of Science in Information Technology · [Cum Laude](#)

Bicol University, Legazpi City, Albay | 2021 · 2025

Senior High School · General Academic Strand

Macalaya National High School, Castilla, Sorsogon | 2019 · 2021

CERTIFICATES

- Backend Developer · Bicol University University Student Council
- Backend Developer · StraStan Solutions Corp. Inc. Internship
