Summary

Backend Developer with experience in building secure and scalable web applications using PHP Laravel, RESTful APIs, AWS, and MySQL. Skilled in working with teams and leading developers to deliver projects on time. Passionate about writing clean code and creating reliable systems that solve real-world problems.

Experience

Internship (Backend Developer)

February 2025 – May 2025

StraStan Solutions Corp.

Bicol University College of Science, Legazpi City, Albay (Remote)

- Deployed and maintained a CMS on AWS, integrating DynamoDB for dynamic content management and high-performance scalability.
- Designed and implemented REST APIs to facilitate seamless frontend-backend communication, ensuring data consistency and reliability.
- Collaborated with UX/UI teams to integrate APIs into customer-facing features while leveraging AWS services for security and uptime optimization.

Backend Developer

August 2024 – June 2026

Bicol University – University Student Council Website

Legazpi City, Albay

- Created the database and migration for the system.
- Created the backend system of the website using PHP Laravel and MySQL.
- Improved transparency and accessibility of student council information for the university community.

Junior Programmer

October 2025 – June 2026

Bicol University Information and Communication Technology Office

Legazpi City, Albay

- Created the backend of Bicol University Center of Excellence System using Laravel and MySQL.
- Created the backend of Bicol University Merit System Promotion using Laravel Livewire, MySQL, MinIO S3 for object storage.
- Created the Property Module for Bicol University Property Management and Monitoring System.
- Led a team of developers in building and maintaining internal systems for the Bicol University ICT Office.
- Assigned tasks, reviewed code, and ensured timely delivery of projects.

Education

2021 - 2025

Bachelor of Science in Information Technology (Cum Laude)

Legazpi City, Albay

Macalaya National High School

2019 - 2021

Senior High School — General Academic Strand

Macalaya, Castilla, Sorsogon

Skills

- PHP Laravel
- JavaScript
- HTML5 & CSS3
- MySQL
- RESTful APIs
- Filament
- Next.js
- API Integration
- AWS Services
- Git & GitHub
- Technical Support
- Debugging
- React Js
- Vue.js
- Tailwind CSS
- Alpine JS
- AI-Assisted Development (ChatGPT, Claude, GitHub Copilot)

Projects

AgTech Web App (Full Stack Developer) | 2024–2025

- Developed the front-end for user interaction and product browsing.
- Built the back-end to handle accounts, product listings, and council data.
- Designed and managed the database for livestock, users, and transactions.
- Created and connected APIs for smooth data flow between systems.
- Deployed and maintained the website on the server/cloud.
- Ensured security, troubleshooting, and regular updates for stable performance.

Unboxed E-Commerce Platform (Full Stack Developer) | 2024

- Built a personal e-commerce site with backend capabilities for showcasing and selling products.
- Implemented order processing and product catalog features.
- Used GitHub for version control and collaboration.

Employee Attendance Management System (Full Stack Developer) | 2024

- Designed the front-end dashboard for employees and admins to log time in/out.
- Built the back-end logic to record attendance and calculate work hours.
- Created and managed the database to store employee profiles and attendance records.
- Developed APIs for retrieving attendance data and generating reports.
- Implemented user authentication and access control for secure system use.

Bicol University University Student Council Website (Backend Developer) | 2024 – 2026

- Created the database and migration for the system.
- Created the backend system of the website using PHP Laravel and MySQL.
- Improved transparency and accessibility of student council information for the university community

Bicol University Center of Excellence System (Backend Developer) | 2025

- Built the backend system using PHP Laravel and MySQL, designing database schemas to support efficient data storage and retrieval.
- Implemented user authentication and access control, restricting system access exclusively to verified Bicol University email accounts for enhanced security.
- Developed RESTful APIs to facilitate smooth communication between the frontend and backend components.

Bicol University Merit System Promotion (Backend Developer) | 2026

- Built the backend system using the TALL stack (Tailwind, Alpine.js, Laravel, Livewire) and MySQL, designing database schemas to support efficient data storage and retrieval.
- Implemented user authentication and access control, restricting system access exclusively to verified

Bicol University email accounts for enhanced security. Create and managed the database to store employee profiles and attendance records.

- Integrated MinIO S3 for scalable and secure file storage, managing document uploads and retrieval within the system.

Bicol University Property Management and Monitoring System (Full Stack Developer) | 2026

- Built the Property Management Module using Filament with Custom Page.

Certificates

Backend Developer - University Student Council Certificate

Backend Developer – StarStan Solutions Corp. Inc. Internship Certificate
